Milwaukee County COVID-19 vaccine data summary

Milwaukee County COVID-19 Epidemiology Intel Team

This report was updated on February 16, 2023 and includes data through February 13, 2023. Note that data for recent weeks may be under-reported due to lags in data entry. This report includes data on primary vaccinations and booster doses.

Daily COVID-19 doses administered to Milwaukee County residents

Figure 1 shows daily total COVID-19 vaccine doses administered to Milwaukee County residents. A total of 1,764,505 doses (including booster doses) have been administered from December 12, 2020 through February 13, 2023. The dark blue color represents the first dose in a series (Pfizer or Moderna). The light blue color indicates a completion dose (first dose of Johnson & Johnson, second dose of Pfizer or Moderna, or third dose for Pfizer age 6M-4Y). The orange color indicates a booster dose (second dose following Johnson & Johnson or third dose following Pfizer or Moderna series).

Figure 1: Daily COVID-19 vaccine doses administered to Milwaukee Co. residents

Figure 2a and 2b show daily COVID-19 vaccine doses administered to Milwaukee County residents; **Figure 2a** includes primary vaccination doses only, and **Figure 2b** shows all doses including boosters. The overlaid black line shows the 7-day average of daily doses and the bars are colored by vaccine: Pfizer (red), Pfizer Age 5-11 (green), Moderna (blue), and Johnson & Johnson (orange). Daily primary vaccination doses peaked in late March to early April 2021 and have since declined until mid-summer when slight increases occurred in tandem with increasing cases thought to be driven by the delta variant. An increase in primary vaccination doses is observed in the second week of November 2021, driven by new eligibility among ages 5-11.

Percentages of first doses of COVID-19 vaccine administered to Milwaukee County residents by age and race/ethnicity groups

Figure 7 shows the percentage of first doses of COVID-19 vaccine administered per week to Milwaukee County residents by age group. After vaccines first became available to healthcare personnel, middleaged groups (25-59) were the majority of new vaccinees. After eligibility opened up to ages 65+, the oldest two age groups became the majority. The younger age groups (< 60) became the majority of people newly vaccinated since eligibility opened up to education staff on March 1st. With the eligibility of children aged 12+, we observed a sharp increase in vaccination for children. Similar increases were observed with the new eligibility of children ages 5-11, and later for ages 6M-4Y.

Figure 8 shows the percentage of first doses of COVID-19 vaccine administered per week to Milwaukee County residents by race/ethnicity. Non-Hispanic Whites were the majority of newly vaccinated individuals for many months, however Black/AA and Hispanic groups have become an increasing proportion of the newly vaccinated over time.

of first doses per week 90% 80+ 80% 60-79 70% 40-59 60% 25-39 18-24 40% 16-17 12-15 5-11 0-4

Completion of primary immunization series among Milwaukee County residents who received at least one dose of Pfizer or Moderna vaccines

Figure 9 describes the timing between primary vaccination doses for Milwaukee County residents who received Pfizer or Moderna vaccines. This graph includes data for residents who received their first dose of Pfizer or Moderna at least 42 days ago (prior to January 1, 2023). The recommended interval for receiving the second dose is 21 days for the Pfizer vaccine and 28 days for the Moderna vaccine; the second dose is considered valid if administered 4 days prior to the recommended interval and up to 42 days following the first dose for each vaccine.

Fully 87.8% of all residents who received their first dose of Pfizer prior to January 1, 2023 received their second dose within 42 days, indicating very strong completion within guidelines for those receiving a first dose.

Figure 9: Vaccine series completion among Milwaukee Co. residents receiving Pfizer or Moderna

Summary of vaccine series completion and booster rates among vaccinated Milwaukee County residents

Table 1 summarizes the rates of primary vaccination series completion and booster uptake by groups based on first vaccine product received, age, sex, and race/ethnicity. The first column, rates of primary vaccination series completion, includes data for residents who received a first dose of Pfizer or Moderna at least 42 days ago; 42 days is the maximum recommended period for receiving the second dose. The second column, rates of booster uptake, includes data for booster eligible residents only; booster eligibility criteria are currently age 12 or older, with one dose of Johnson & Johnson vaccine at least 2 months ago or completion of Pfizer or Moderna primary vaccination series at least 5 months ago. While vaccine series completion rates are high and vary only slightly among groups, receipt of booster doses among booster eligible individuals varies significantly by vaccine product, age, and race/ethnicity with slight variation by sex.

Characteristic	Percent with second dose within 42 days among Pfizer and Moderna receipients ¹	*Percent boosted among eligible ¹
First vaccine received		
Pfizer	358,542 / 410,650 (87.3%)	217,726 / 372,553 (58.4%)
Moderna	166,291 / 187,431 (88.7%)	116,197 / 172,414 (67.4%)
Johnson & Johnson		16,800 / 34,629 (48.5%)
Age		
0-4	5,327 / 7,871 (67.7%)	
5-11	25,308 / 32,063 (78.9%)	9,775 / 27,310 (35.8%)
12-15	26,504 / 30,519 (86.8%)	12,198 / 28,020 (43.5%)
16-17	13,247 / 15,166 (87.3%)	6,421 / 14,058 (45.7%)
18-24	48,323 / 58,865 (82.1%)	23,427 / 55,979 (41.8%)
25-39	123,864 / 144,179 (85.9%)	71,541 / 140,502 (50.9%)
40-59	143,882 / 160,164 (89.8%)	102,990 / 164,051 (62.8%)
60-79	118,433 / 127,590 (92.8%)	105,729 / 128,414 (82.3%)
80+	19,945 / 21,664 (92.1%)	18,642 / 21,262 (87.7%)
Sex		
Female	281,883 / 319,962 (88.1%)	191,879 / 307,994 (62.3%)
Male	241,877 / 276,703 (87.4%)	158,297 / 270,404 (58.5%)
Unknown	1,073 / 1,416 (75.8%)	547 / 1,198 (45.7%)
Race/Ethnicity		
Black or AA	97,251 / 119,157 (81.6%)	57,077 / 112,360 (50.8%)
White	287,442 / 313,042 (91.8%)	216,829 / 311,193 (69.7%)
Hispanic	73,194 / 86,813 (84.3%)	40,188 / 82,817 (48.5%)
Asian or NHOPI	29,813 / 34,224 (87.1%)	16,807 / 31,869 (52.7%)
AIAN	2,977 / 3,404 (87.5%)	1,913 / 3,315 (57.7%)
Other	19,651 / 22,662 (86.7%)	11,121 / 21,595 (51.5%)
Unknown	14,505 / 18,779 (77.2%)	6,788 / 16,447 (41.3%)

¹n / N (%)

^{*}Booster eligible population is aged 5+ with complete primary vaccination prior to September 16, 2022 for Pfizer or Moderna series, or prior to December 15, 2022 for Johnson & Johnson
